

When visiting Japan with a short-term visa or a short-term tourist visa (including medical tourism) from overseas, we recommend using the "BINZ EDUCATIONAL RESEARCH INSTITUTE", which is cooperated with the medical corporation "SAISEI MIRAI", as the endorser for your stay in Japan.

BINZ EDUCATIONAL RESEARCH INSTITUTE

BINZ Educational Research Institute is located in Osaka, one of Japan's representative metropolitan cities. We serve as a gateway to Japanese universities, graduate schools, and language schools for international students from China, Southeast Asia, the United States, and other countries who wish to study in Japan. In addition, we provide medical tourism services for cutting-edge medical treatment. By partnering with various institutions such as universities, Japanese language schools, preparatory schools, medical facilities, and welfare-related vocational schools, we respond to the needs of language students with a focus on employment opportunities after graduation, and patients who come to Japan for medical purposes. As an educational and medical institution, BINZ Educational Research Institute aims to contribute to diverse education and healthcare connecting overseas and Japan, with a team of language-proficient staff from various countries.

For patients coming to Japan on short-term visas and short-term tourism visas (including medical tourism), an endorser residing in Japan is required. BINZ Educational Research Institute is one of the offices that has partnered with the medical corporation Saisei Mirai to act as an endorser for such patients. We also provide support for accommodation, meals, and small trips during your stay in Japan.

※Please note that all costs related to the above will be paid in a lump sum to the clinic to minimize the patient's burden

BINZ Educational Research Institute
Osaka Office: (within SYNTH), 103, 1F Urban Ace KITAHAMA Bldg., 2-3-7 Hiranomachi, Chuo-ku, Osaka, Japan.
